SUMMARY OF ST. LOUIS MARKETS.

Yesterday's trading in grain was comparatively light and the net result was an unchanged market. Early in the session there was some fairly good buying by outsiders, especially for each account, but later both spot inquiry and speculative interest declined and recessfons followed because of lack of support. Receipts were light, but after the first hour there was practically no outward movement from this or other Western distributing points. Liverpood was weak and lower and foreigners generally were not active on the buying side, though so far as could be judged there was no heavy selling movement. Support the support of the country of the support of the sup on the buying side, though so far as could be judged there was no heavy selling movement. During the week the primary receipts decreased, but much less than had been

New York: Feb. 10. Spot-Rio steady: No. 7 invoice Note: mild quiet; Cordova 85/12c. The market opened steady, with prices 5 to 10 points higher, and soon after the call advanced an additional 5 to 10 points on active general buying, led by room shorts and European Interests. Bull leaders were active buyers, as were Wall street people. A firmer ruling of European markets and some failling off in Brazilian receipts belied to create a friendly feeling. But Inte in the day the market was adversely affected by the arricals from New York from Brazili, nessimistic predictions as to the future crop movement and the scarnity of demand for actual supplies. The room once more took the hear side for a temperaty turn. If for nothing more. At the close the market was steady, with June 56/19 points higher and other cedions to boints higher.
